Committee (EAC)

What Are Native Plants?

Native plants are those that grow naturally in an area.

Why Plant Native Plants?

Native plants have adapted to the local climate and soil conditions. This means they can provide food and habitat for local wildlife and reduce the need for mowing, fertilizers, pesticides and extra watering.

Bees & Butterflies

Asters
Black-eyed Susan's
Common thistles
Goldenrods
Milkweed
Violets & Irises

Hummingbirds

Bee balm
Canada lily
